-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. Please note that the application has been docketed to a different examiner. Please refer all future communications regarding this application to the examiner of record, using the information supplied in the final section of the office action.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-18 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-9,12,15 of copending Application No. 09/832,339. Although the conflicting claims are not identical, they are not patentably distinct from each other.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 1,9,10,12-18 of the instant invention correspond to claims 1-9,12,15 of 09/832,339. The difference between claims 1,9,10 of instant invention and claim 1 of 09/832,339 in that claims of instant invention where additional processor determines virtual address for the first and second processor. It would have been obvious to person of ordinary

skill in the art to recognize that additional processor is needed in order for two processor to correctly identify each other and route data accordingly.

Claims 2-7 correspond to claims 2,3,4,6,7,8 of (09/832,339).

Claim 8: It would have been obvious to person of ordinary skill in the art determine based on the information received a behalf of the second processor, information about a firewall that selectively restricts a flow of information into the first processor in order to filter out and prevent any hazardous information penetrating into the system.

Claim 11: It would have been obvious to person of ordinary skill in the art to provide cryptographic information by the additional processor to provide to the first processor the cryptographic information for the second processor and to the second processor the cryptographic information to the first processor in order to conduct secure communication between two processors. Further, since third or additional processor providing such information it establishes trust between two entities.

Response to Applicant's Arguments

2. Claims 1-18 are pending. Previous grounds of rejection are withdrawn in view of Applicant's arguments in the Amendment filed on 2/7/2005. However, examiner discovered double patenting issue during the examination. Please see new rejections above.
